### **DETAILED ACTION**

The reply filed 12/19/06 consists of amending claim 1, submittal of a terminal disclaimer and remarks related to rejection of claims.

### ***Response to Arguments***

The Applicant argues that the prior art does not disclose or suggest the second electrode being a pointed electrode and this distinguishes the present application over the STAINES reference and rendering moot the need for filing a terminal disclaimer. The Examiner maintains that the mere claim that the second electrode being a pointed electrode renders the claim patentable would not be correct for the geometric configurations of electrodes are well understood in the field of high voltage discharge. The patentable features of the microwave generator are more than the pointed electrode and therefore it is closely related to the microwave generator structure of the STAINES et al patent.

### ***Terminal Disclaimer***

The terminal disclaimer filed on 1/25/07 disclaiming the terminal portion of any patent granted on this application that would extend beyond the expiration date of 10/9/2022 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Allowable Subject Matter***

Claims 1-9 allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not disclose the microwave geometry nor the parallel connection of the plurality of such microwave generators.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
